**Sector Composition**

**Performance (30-Day Net Yield<sup>5</sup> %)**

<sup>1</sup> The current seven-day yield, also referred to as the current annualized yield, represents the net change, exclusive of capital changes and income other than investment income, in the value of a hypothetical account with a balance of one share (normally \$1.00 per share) over a seven-day base period expressed as a percentage of the value of one share at the beginning of the seven-day period. This resulting net change in account value is then annualized by multiplying it by 365 and dividing the result by 7.

<sup>2</sup> The monthly distribution yield represents the net change in the value of a hypothetical account with a value of one share (normally \$1.00 per share) resulting from all dividends declared during a month by the Pool expressed as a percentage of the value of one share at the beginning of the month. This resulting net change is then annualized by multiplying it by 365 and dividing it by the number of calendar days in the month.

<sup>3</sup> Weighted Average Maturity: Calculated by the final maturity for a security held in the portfolio and the interest rate reset date. This is a way to measure a fund's sensitivity to potential interest rate changes.

<sup>4</sup> Rated AAAM by Standard & Poor's ("S&P") and AAAMmf by Fitch Ratings ("Fitch"). S&P's fund ratings are based on analysis of credit quality, market price exposure, and management. According to S&P's rating criteria, the AAAM rating signifies excellent safety of investment principal and a superior capacity to maintain a \$1.00 per share net asset value. The Fitch AAAMmf rating reflects Fitch's review of the fund's overall credit quality and diversification and low exposure to interest rate and spread risks as well as the capabilities and resources of PFM Asset Management LLC as investment adviser. According to Fitch's rating criteria, the AAAMmf rating signifies an extremely strong capacity to achieve the fund's investment objective of preserving principal and providing shareholder liquidity through limiting credit, market, and liquidity risk. However, it should be understood that these ratings are not "market" ratings nor a recommendation to buy, hold or sell the securities. <sup>5</sup> As of the last day of the month. The 30-day yield represents the net change, exclusive of capital changes and income other than investment income, in the value of a hypothetical account with a balance of one share (normally \$1.00 per share) over a thirty-day base period expressed as a percentage of the value of one share at the beginning of the thirty-day period. This resulting net change in account value is then annualized by multiplying it by 365 and dividing the result by 30.

<sup>6</sup> Percentages may not add to 100% due to rounding.
